## Smart-Inverter ULT Freezer

## Smart-Inverter ULT Freezer

### Scope of Application

Applicable for products and samples which require strict storage ,biological products, electronics and special materials. Products are widely used in hospitals, disease control , CDC, scientific research institutions biomedical engineering institutes, agriculture/ fishery companies.

## Smarter by Design

Midea Smart-Inverter ULT Freezer are designed to be energy saving. The control system automatically tunes the speed of the compressors to optimize the operation.

### Smart-Inverter Technology

Variable speed compressors are coupled in the freezer, the compressors will work based on the loads and inter change fluctuation. The control system automatically tunes the speed of the compressors to optimize the operation.

### Low Energy Consumption

Smart-Inverter freezer coupled with environmentally safe and friendly hydrocarbon refrigeration system, allows the freezers to operate at a low level of energy consumption.

### High Temperature Stability

The innovative control algorithm balances the effects of temperature loss with the unique frequency conversion refrigeration system, ensuring the cabinet temperature stability.

### Active ECO Technology

Midea active ECO technology can significantly reduce energy consumption and maintain good interior temperature uniformity at the same time.

## 1 Multi-layer Silicone Sealing Structure

Multi-layers silicone gaskets provide a tight seal between the inner doors and outer door, reducing heat exchange rate and retaining the inner temperature better when there is power failure.

## 2 Multi-level Alarms

Alarm functions include high, low temperature, sensor error, power failure, high ambient alarm, door open alarm etc.

## 3 Ingenious Handle Design

Ingenious handle design helps you easy to open and close door easier. Lockable handle safeguards your precious samples. Padlock can also be added for extra sample safety.

## 4 Maximum Samples Storage

Optimized dimension design provides maximum inner space for 40,000.pcs 2ml vial.

## 5 USB Interface

Enables users to download historical temperature data for compliance/auditing purposes.

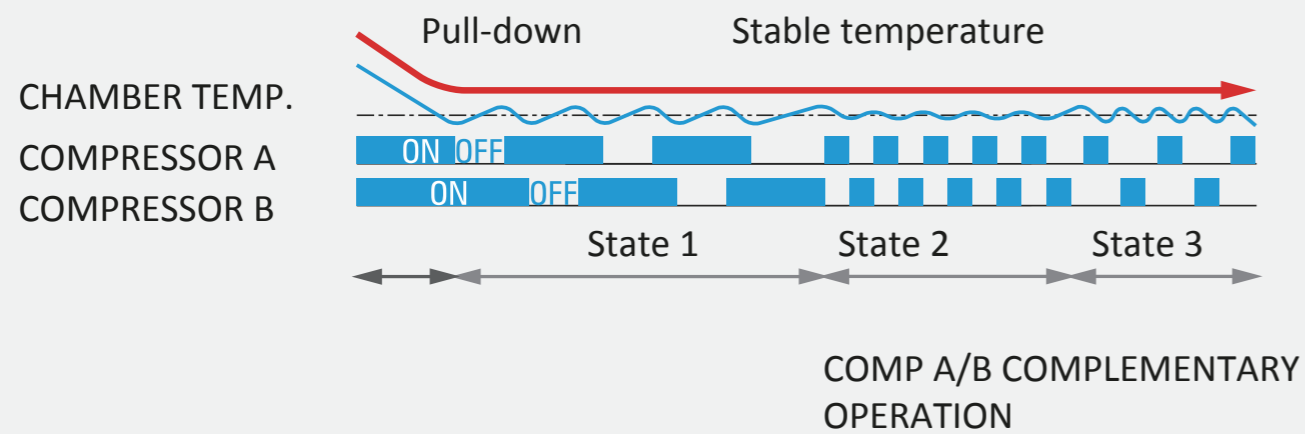

## 6 Heated Pressure Equalization Port

It allows users to re-open the main door quickly when entering, rust-proof, freeze-free.

## Discover Midea DualGuard ULT Freezer

Midea Active ECO Technology is applied to all Midea ULT freezer, which means all the products default to run in ECO mode. Based on ECO technology, the compressors performance based on the loads or temperature change.

The control system automatically tunes the speed of the compressors to optimize the operation. So, Midea Active ECO Technology can significantly reduce energy consumption while maintaining good interior temperature uniformity.
